

PARING AN EPSON HIP PRINTER

JANAM

1. Ensure the only printer powered on is the printer that will be paired with the handheld computer.
2. From your handheld:
 - a. START MENU → SETTINGS → CONNECTIONS tab → BLUETOOTH → if there is an old printer in the menu, click and 'hold' on that printer and DELETE (most likely named 'BT304' → ADD NEW PRINTER → when printer is found (BT304), click and ADD NEW DEVICE → enter passcode of '4254' (for grey Epsoms) or '0000' (for black Epsoms) → OK (should successfully add your printer) → ADVANCED → 'check' the box labeled 'Serial Port' → SAVE
 - b. From same menu: COM PORTS tab → NEW OUTGOING PORT → from the dropdown menu, select COM 7 (occasionally may be 6 or 8) → uncheck 'Secure Connection' → FINISH (close out this Bluetooth menu if it is not already)
 - c. START MENU → 5050 program → SETUP → EDIT DEVICE SETTINGS → click on 'KB' and the 'copyright' symbol → enter access code of 'f50mdd' or 'f50mmdd' (i.e. 'f50925' for September 25th or 'f501012' for October 12th; m=month, d=date) → click on the green circle → highlight the 'printer port' dropdown and select COM7 → OK
3. Your printer should now be paired with the handheld computer:
 - a. To test print, from your 5050 program: SETUP → TEST PRINTER
 - b. In order to load the latest draw info and ticket logo, you may need to load the draw's latest settings: SETUP → GET APP'S SETTINGS AND EVENTS
