

5050 SCOREBOARD INTEGRATION

1. Video export from our server

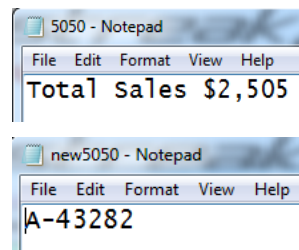

- Extend the 5050 Server desktop, with real-time data embedded in graphic
- PC to TV Converter generally needed
- Can extend via VGA or coaxial

2. XML or TXT document exported to a *shared* folder or DropBox

- Shared folder within same network, file is re-saved approximately every 5-15 seconds
- Mutual DropBox folder can be created, and placed on 5050 and Scoreboard computers
- An actual Sample XML or TXT file can be given upon request

```
<?xml version="1.0" encoding="UTF-8"?>
<Draw><DrawDate>8/29/2013</DrawDate>
<Pot>$1,242</Pot>
<WinAmout>$621</WinAmout>
<WinTicket>A-43282</WinTicket>

</Draw>
```

Note: Text changes from 'Total Sales' to the winning number once the number is drawn

3. XML to a URL:

<https://apix.pointstreak.com/partner/?sport=fifty&action=getdrawinfo&eventid=24&installationid=1849&u=daks&p=dakTrOn>

- Pointstreak 5050 can provide you with your specific 'installationID' if you choose this route
- The 'eventID' will change each game (generally increases by 1), and should be communicated from the raffle manager to the scoreboard production crew

4. RSS:

<https://apix.pointstreak.com/partner/?sport=fifty&action=getrssdrawinfo&eventid=3&installationid=1000107&u=kcroyals&p=B@ll>

- Pointstreak 5050 can provide you with your specific 'installationID' if you choose this route
- The 'eventID' will change each game (generally increases by 1), and should be communicated from the raffle manager to the scoreboard production crew

5. Update via manually submitted text message, or via:

- Online Site: <http://fifty.pointstreak.com/draws.html>
- Mobile Site: <http://m.pointstreak5050.com>
